

Brain Buttons Kindergarten's tagline is "The Only School your Child Needs to Go!!!" and yes, we believe it wholeheartedly. What sets this centre apart from other preschools is its unique curriculum that centres on the belief that children not only learn how to think as they grow up, but are also busy constructing their brains in the meantime.

Catering to toddlers, playgroups, nursery and kindergarten kids, the curriculum thrives on its Whole Brain Learning Approach that consists of activities that not just enhance, but multiply your child's 7 intelligences. Flash cards and music are utilised here too, together with Brain Gym exercises to aid your kid in making better use of his innate learning potential. Suffice to say that this 'Brain Gym' also helps to work out your kid's mind and strengthen his thinking prowess.

Concerned that your child might not be able to cope when he's old enough to go to primary school? Here,

Brain Buttons ensures that your child's literary skills are well taken care of, thanks to enrichment preparatory classes in K2 in English, Chinese and Mathematics. Role-playing, music & movement, creative writing & thinking and Hanyu Pinyin are just some of the fun activities included.

Not neglecting your child's moral values, Brain Buttons also introduces activities that build your child's self-esteem and improve his social etiquette.

Facilities include the Learning Centres, which are split into these five: Creative Hands on Art & Crafts, Experimental Science Discovery, Computer-Assisted Learning, Social Studies and Fun Cookery. Kids can also go on a rampage in outdoor activities such as Sand Play and Water Play.

Vegetarian and non-pork food is provided.
